

Netilla Secure Gateway Appliance^C

A Simple, Secure Gateway for Citrix[®] MetaFrame[®] Presentation Server

With the Netilla Secure Gateway Appliance (SGA-C), Citrix MetaFrame remote access takes a secure step forward with a far simpler, safer, and less costly approach than traditional access alternatives. By combining everything you need for secure application access into a single network appliance, the Netilla SGA dramatically reduces the cost and complexity once required for a secure Citrix remote access implementation.

Features and Benefits

NETILLA SECURE GATEWAY APPLIANCE (SGA) FEATURES

- Appliance-based solution installs in minutes
- Supports Citrix ICA[®] Java[™] 8.x clients
- Requires only a Web browser on local PC
- Browser-based access eliminates client-side configuration and support
- Concurrent access for 25 to 50 users
- Integrated firewall and intrusion protection tools
- Works on public and private IP networks
- Investment Protection: Simple migration path to Netilla SSL VPN systems products

NETILLA SGA MANAGEMENT FEATURES

- Leverage existing authentication and policies from external databases
- Granular access control and policy enforcement
- Powerful virtualization capabilities and user segmentation with the Netilla V-Realm[™] authentication framework
- Web-based administration GUI with delegated administration rights
- Strong authentication for administrator login
- Management reporting via web-based GUI or Syslog tools
- No PC client Admin rights required

WEB-BASED ACCESS TO CITRIX ICA JAVA CLIENT

- Reverse web proxy with sophisticated Java applet re-writing capabilities
- Ideal for remote employees, kiosks or Internet cafes.

NETILLA SGA SECURITY FEATURES

- SSL VPN technology secures access at the application layer
- Stateful Packet Inspection Firewall (SPI) protects SGA and network resources
- Netilla Secure Desktop, Host Integrity Verification and Adaptive Policies (by V-Realm)
- Broad authentication leverages all leading protocols (Windows[®] SMB/Active Directory, LDAP, RADIUS[®], RSA SecurID[®], Kerberos, VASCO[®], Aladdin[®], ActivCard[®])
- PKI with client-side certificates and revocation lists
- Session Timeout control (by V-Realm)

Securing & Enhancing Citrix MetaFrame

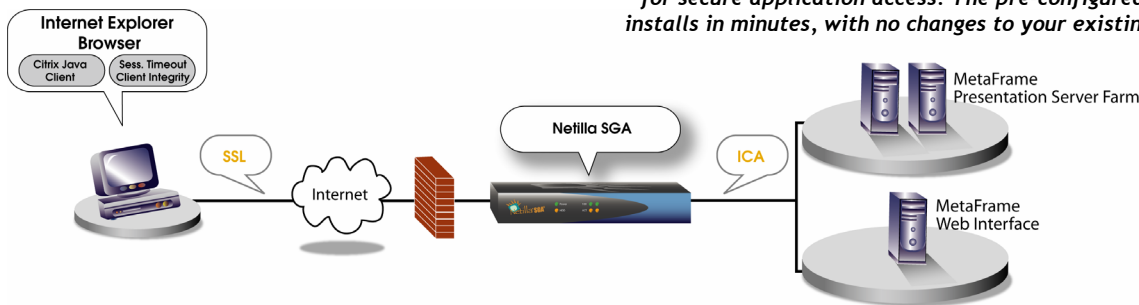

Powered by Netilla's SSL VPN technology, the SGA blends application access, strong network protection, and ease of use into a single, hardened appliance. The result is a secure, fast to deploy and low maintenance solution that greatly enhances your Citrix MetaFrame investment.

THE NETILLA SGA ENHANCES THE METAFRAME PRESENTATION SERVER ACCESS STORY:

- A secure desktop option for untrusted PC's
- Role-based access and policy enforcement
- PKI and client-side certificates
- Integrated firewall security
- Host Integrity tools
- Cache Cleaner functionality

Feature	Benefit
Fast, streamlined deployment to remote users	Extend your Citrix application infrastructure to day extenders, telecommuters, business partners, suppliers, sales personnel, extranet users, and customers instantly and without IT/Help Desk support
Leverage your existing Citrix infrastructure	Adds value to your Citrix investment by adding simple, secure remote application access
Familiar browser-based access	Eliminates end user retraining
Built on ICSA Labs Certified Security	Netilla's SSL VPN technology has been certified by ICSA Lab's rigorous security standards
Strong network protection and client integrity tools	Secures access from kiosks and other untrusted PCs, while MetaFrame resources remain shielded in the private network
Simpler, safer Microsoft IIS Server Use	Web servers (Web Interface / NFuse) can remain deep in the data center and assigned private IP addresses, minimizing security risks and patch management concerns
Quick installation	Pre-configured appliance sets up in minutes with no changes to your existing network
Simplified Management	Easy to maintain appliance reduces IT administration and maintenance
One appliance does it all	Access, security, authentication and policy within a single appliance - Greatly lowered IT hassles and costs of ownership, maintenance, and support

The Netilla SGA includes everything you need for secure application access. The pre-configured appliance installs in minutes, with no changes to your existing network.
